INDUSTRIAL FASTENERS | ENGINEERING COMPONENTS | GLOBAL SUPPLY | EXPORT SOLUTIONS

COMPANY OVERVIEW

VISION

To become a globally recognized engineering supply and sourcing organization delivering reliable industrial solutions across international markets.

MISSION

To simplify industrial procurement through quality products, technical expertise, dependable supply chains and customer-centric service.

Who We Are

PD Nova Engineering LLP is an emerging engineering sourcing and supply company specializing in industrial fasteners, engineered components, industrial consumables and customized engineering solutions.

We serve domestic and international customers by connecting them with qualified manufacturing partners while ensuring quality, traceability, technical compliance and timely delivery.

Our objective is to become one of the most trusted engineering procurement and supply partners for industries worldwide.

CORE VALUES

Integrity

Quality

Commitment

Reliability

Export Reach

Why Customers Choose PD Nova

Our commitment to engineering excellence sets us apart

Engineering Understanding

Deep technical knowledge of fastener and component applications

Export Documentation Expertise

Full compliance with international trade documentation requirements

Vendor Qualification Process

Systematic evaluation of all supply chain partners

Competitive Pricing

Value-engineered solutions without compromising quality

On-Time Delivery

Committed to schedule adherence and supply chain reliability

Global Sourcing Capability

Access to qualified manufacturers across multiple countries

Reliable Manufacturing Network

Vetted and qualified manufacturing partners

Technical Support

Engineering assistance for specification and selection

Quality Assurance

Multi-level inspection and traceability systems

Single Window Procurement

One trusted partner for all engineering supply needs

Industries We Serve

Engineering supply solutions across critical industrial sectors worldwide

Product Portfolio

Comprehensive range of industrial fasteners and engineered components

Industrial Fasteners

- Hex Bolts & Hex Nuts
- Washers & Threaded Rods
- Stud Bolts & Anchor Bolts
- Foundation Bolts & U Bolts
- Socket Head Screws
- Machine Screws & Self Drilling Screws
- Rivets

Special Fasteners

- Custom Fasteners
- Drawing-Based Components
- High Tensile Fasteners
- Stainless Steel Fasteners
- Exotic Alloy Fasteners

Engineering Components

- Machined Components
- Forged Components
- Fabricated Components
- Industrial Hardware
- MRO components

Custom specifications available · All items to international standards · Material Test Certificates provided

Material Capabilities

Wide range of materials to meet diverse engineering and industry requirements

- Carbon Steel
- Alloy Steel
- Stainless Steel
- Duplex Stainless Steel
- Super Duplex SS
- Brass
- Copper Alloys
- Nickel Alloys
- Special Engineering Materials

Engineering Standards

Our products comply with all major international engineering standards to ensure seamless integration with global supply chains and project requirements.

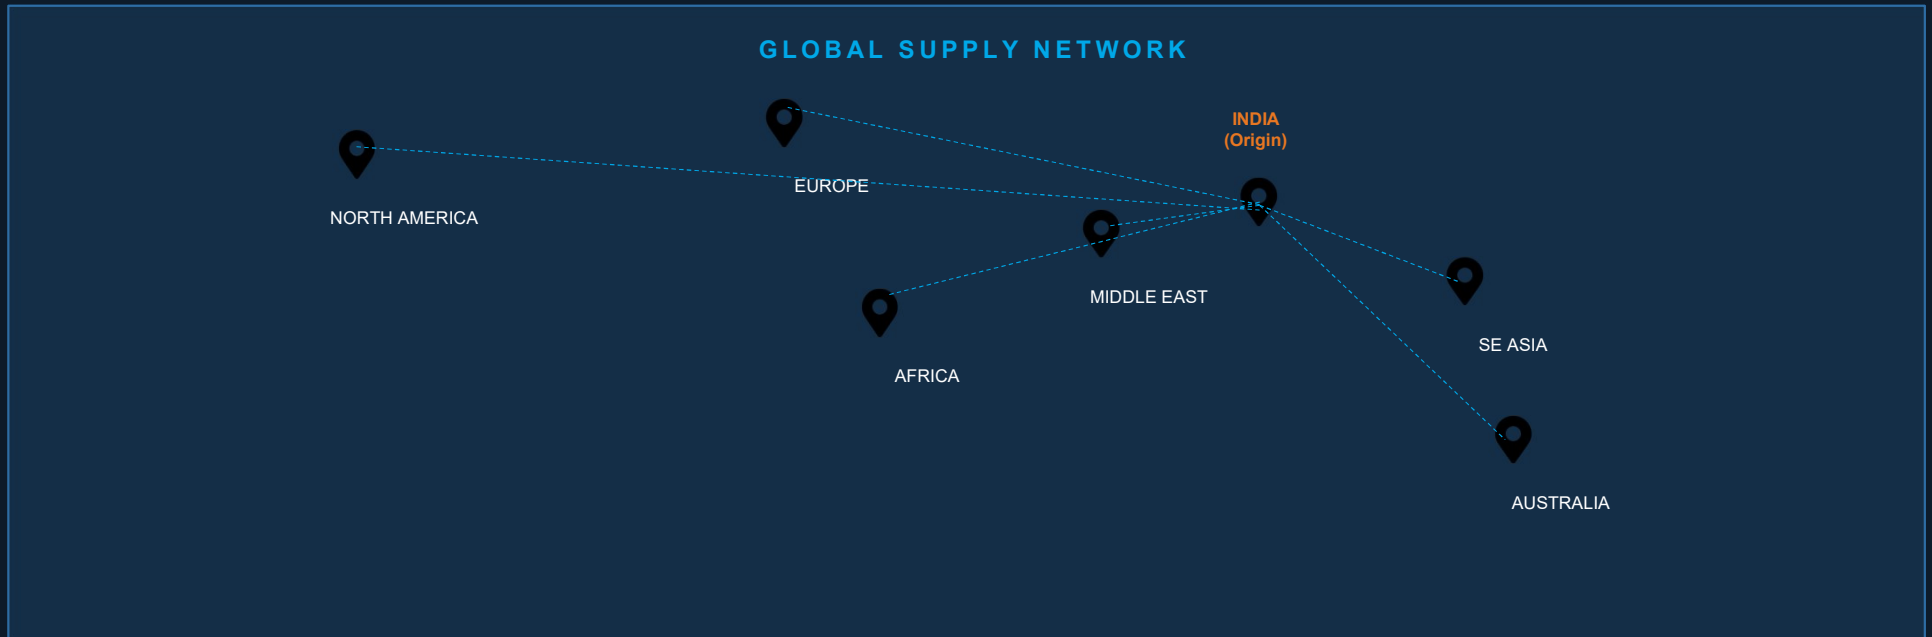

DIN	ISO	ASTM	ASME
BS	JIS	IS	Customer Specifications

Custom Specifications

We manufacture and source components precisely to customer-supplied drawings, specifications, and proprietary engineering standards. Our team evaluates feasibility, recommends materials, and ensures full compliance with your project requirements.

Supply Chain Strength

A robust, globally connected supply ecosystem built for reliability and performance

Qualified Vendor Network

Manufacturing Partnerships

Vendor Evaluation Process

Quality Monitoring

Export Logistics Coordination

Multi-Country Supply

Quality Commitment

Our quality assurance framework ensures reliability at every stage

01

Incoming Material Verification

Raw material verification at receipt against purchase specifications and standards

02

Dimensional Inspection

Full dimensional checking against engineering drawings and tolerances

03

Material Traceability

Heat numbers, mill certificates, and batch tracking maintained throughout

04

Third Party Inspection Support

Coordination with SGS, Bureau Veritas, TÜV and other inspection agencies

05

Mill Test Certificates

EN 10204 3.1 & 3.2 certificates provided for all critical applications

06

Compliance Documentation

Full documentation package including CoC, CoO, packing lists, and MTC

"Quality is not inspected into a product. It is built into every stage of sourcing, manufacturing and delivery."

Global Export Capability

Fully equipped for international trade documentation, logistics coordination, and cross-border supply.

TARGET MARKETS

- Europe
- Middle East
- Africa
- North America
- Southeast Asia
- Australia

Export Documentation

Commercial Invoice

Legally compliant commercial invoice for customs clearance

Packing List

Detailed packing list with dimensions, weights and marking

Certificate of Origin

Country of origin certification for customs and preferential duty

Inspection Documents

Third party and in-house inspection reports as required

Material Test Certificates

Mill certificates and compliance documentation

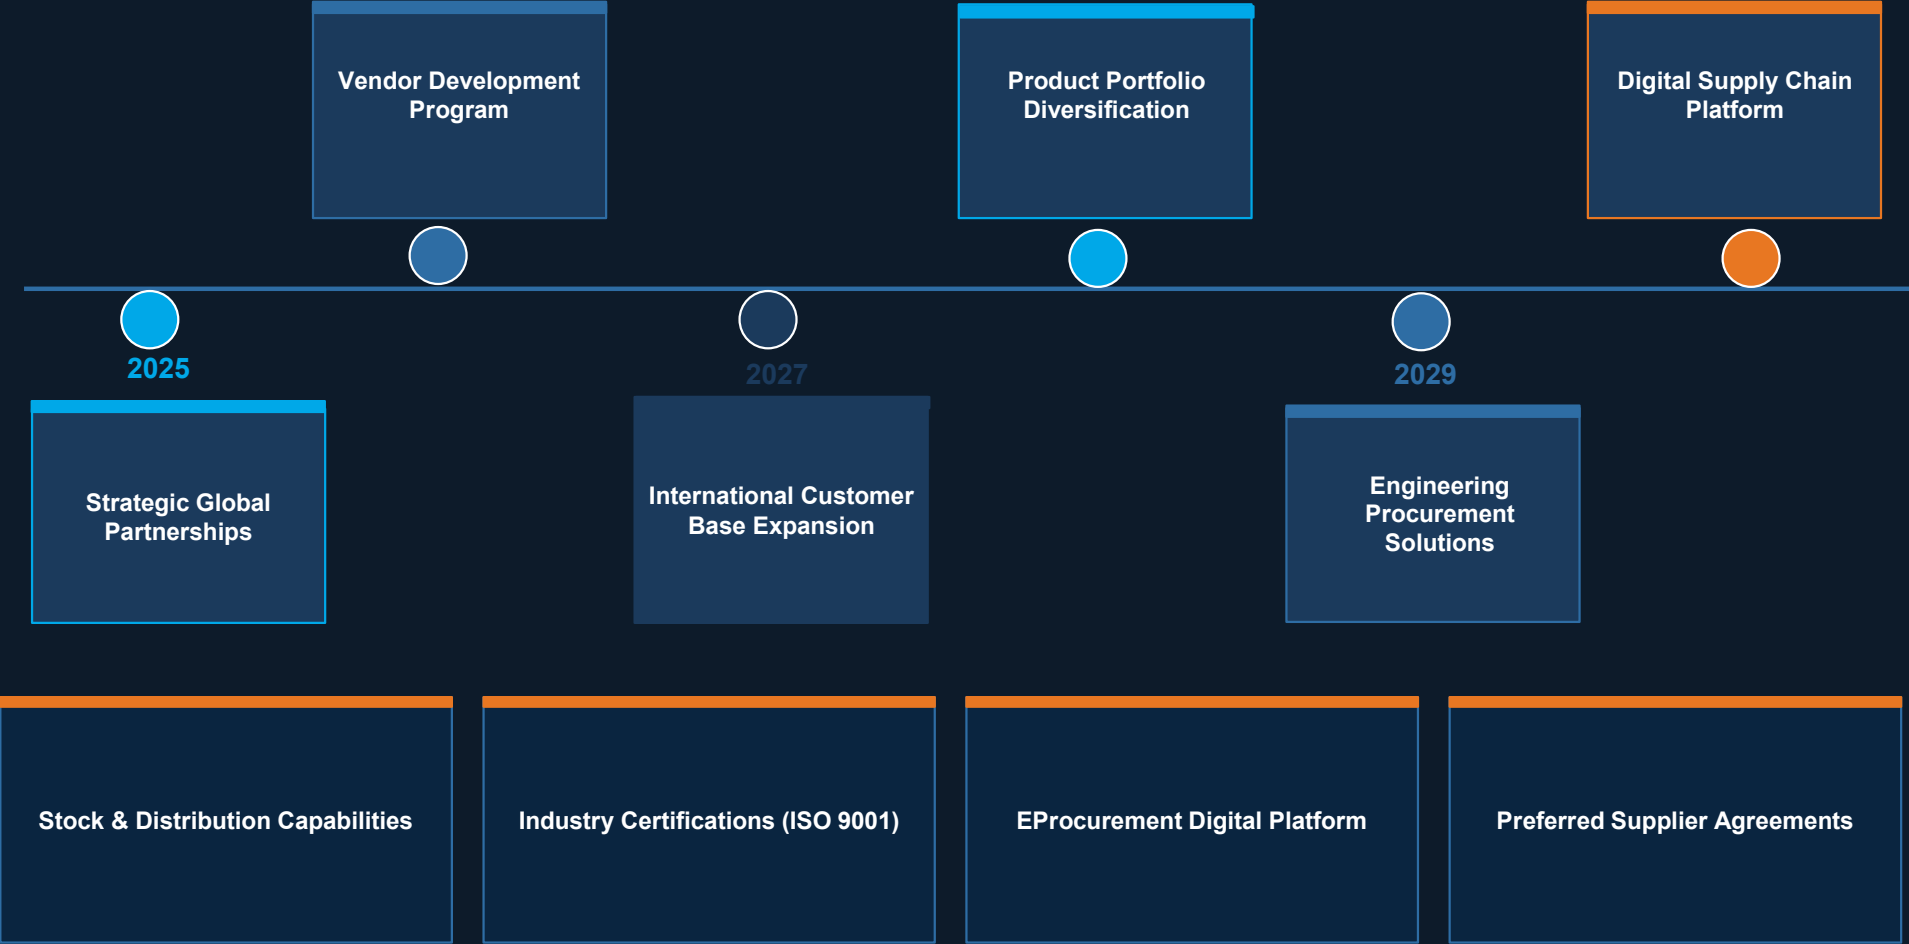

Export Compliance

Full regulatory compliance for destination country requirements

Door-to-Port and Door-to-Door Coordination Available for All Export Shipments

PD Nova 2030 Vision

Our strategic roadmap to becoming a globally recognized engineering supply organization

Our goal is not merely to trade products but to create long-term engineering supply partnerships built on trust, quality and performance.

PD Nova Engineering LLP is committed to becoming a preferred sourcing partner for industrial customers worldwide.

Management Team

PD Nova Engineering LLP

Our Commitment

Long-term Partnerships

Building relationships that endure beyond individual transactions

Quality Without Compromise

Every product delivered to the highest applicable standard

Global Perspective

International thinking with deep local engineering expertise

Continuous Improvement

Always enhancing our processes, products, and service delivery

Corporate Information

REGISTERED OFFICE

Office No. 304, Rajmandir Complex,
Near Shree Ram Plaza,
Fourway Lane Road,
Pipavav Port, Rajula,
Amreli, Gujarat, India – 365560

CORPORATE OFFICE

2nd Floor, Rell Ahmedabad,
Near Vikramnagar,
Iscon – Ambli Road,
Ahmedabad,
Gujarat – 380058

PD Nova Engineering LLP is registered under Indian Partnership laws, serving domestic and international customers from its offices in Gujarat, India. Our strategic location near Pipavav Port enables efficient handling of export logistics.
